

Internal Audit Managerial Skills

PERFORMING AN EFFECTIVE QUALITY ASSESSMENT

Course Description

As an organization grows and its internal processes change and evolve, its quality monitoring process must keep pace. To ensure consistent quality in this dynamic environment, an ongoing commitment to growth and improvement is essential.

The required elements of a Quality Assurance and Improvement Program (QAIP) include periodic internal assessments and external assessments to demonstrate conformance with The IIA's International Standards for the Professional Practice of Internal Auditing. In addition, a quality QAIP can provide evidence to the audit committee and management that the internal audit activity is efficient, effective, and adding value. It can also build stakeholder confidence and document a commitment to quality, leading practices, and the internal auditors' mindset for professionalism.

This course will provide you with the appropriate knowledge and skills to plan, perform, and evaluate the results of an external quality assessment case study. You will also learn about the processes and tools in the IIA Quality Assessment Manual (QA Manual) that can help you identify opportunities to improve your internal audit quality activities.

Course Topics

- Quality Manual and Process Overview.
- Planning the Quality Assessment.
- Performing the Quality Assessment.
- Evaluating Quality Assessment Results.
- Periodic Self-assessment Application.
- External Quality Assessment Options.
