Internal audit sebelum 'modern' – IIA (1941)

- 4500 – 1940s

Sejak 4500 SM
Babilonia – Hamurabi
Kalifah Omar bin Khatab

2nd oldest profession
Chinese emperors

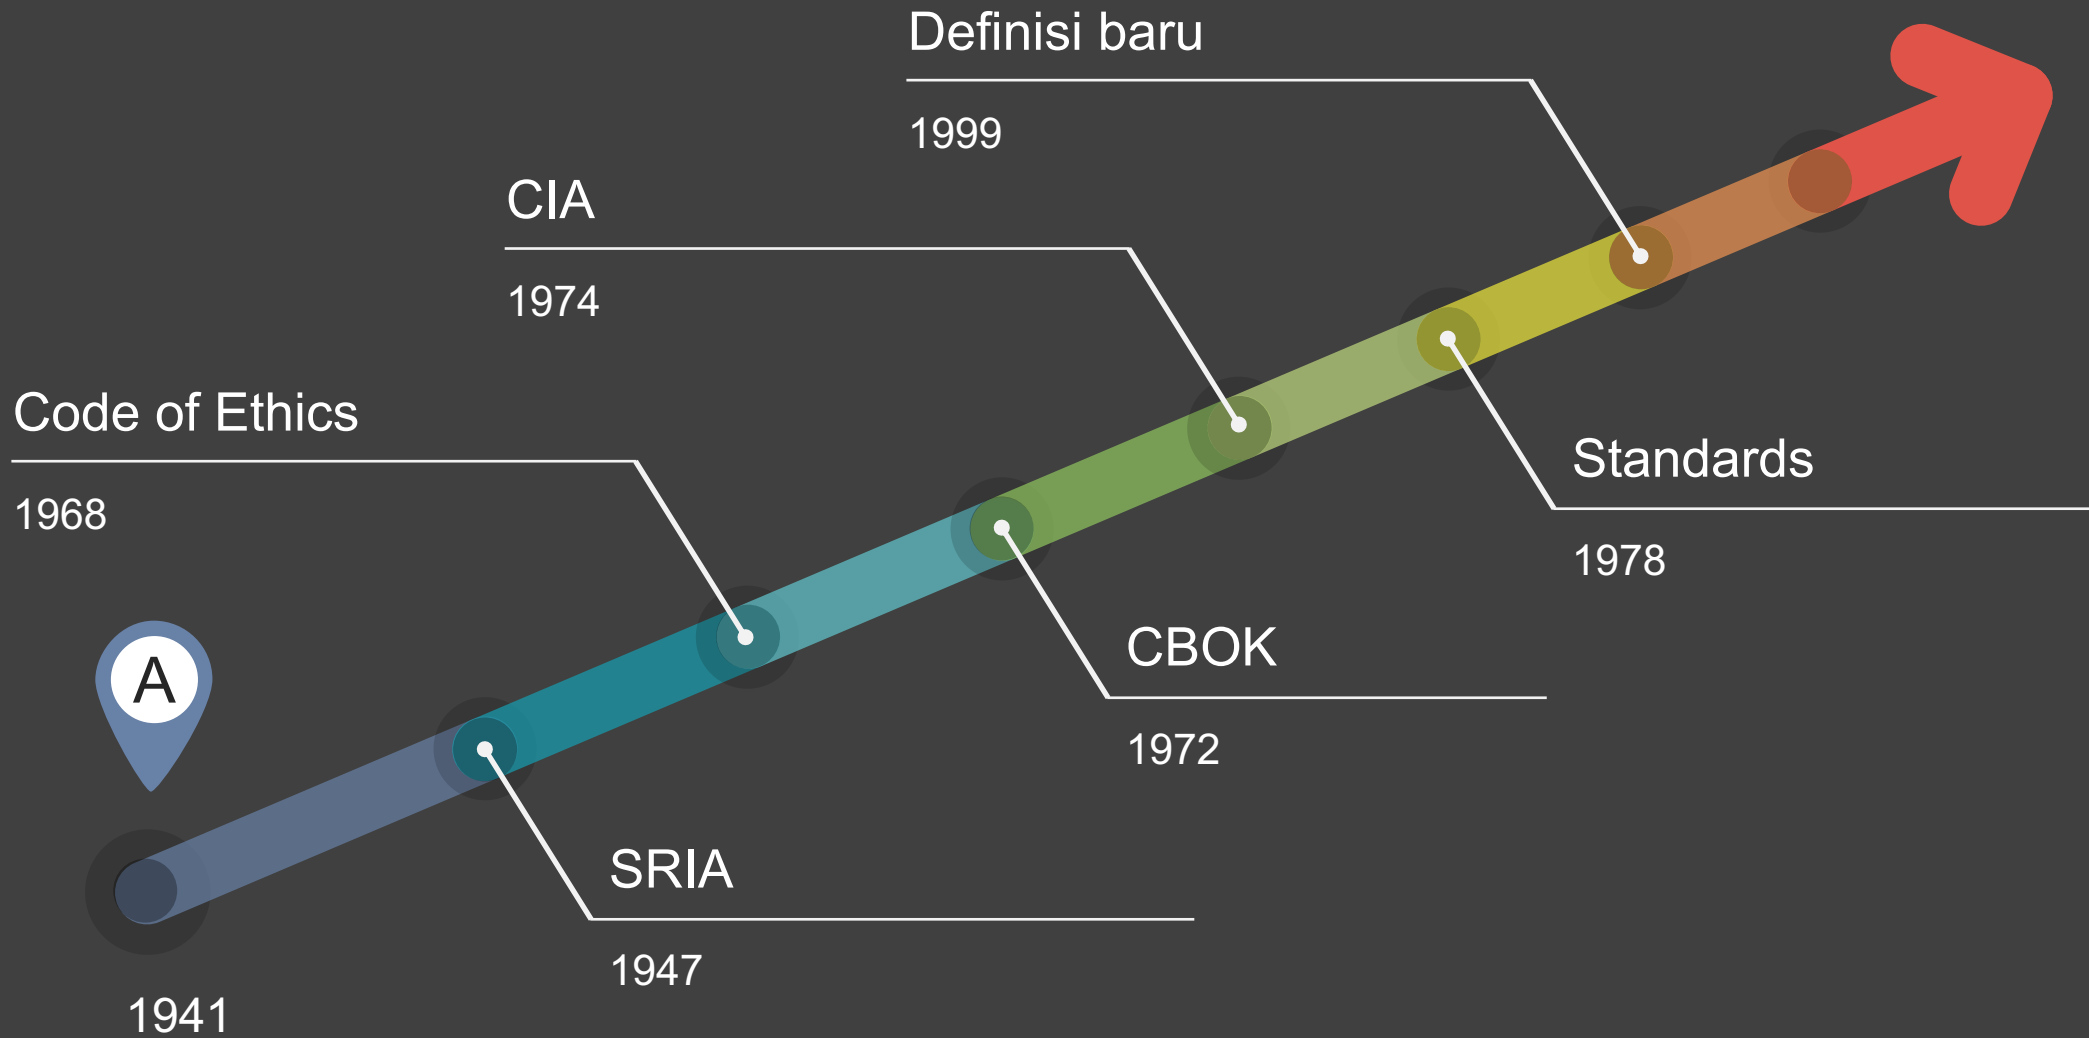

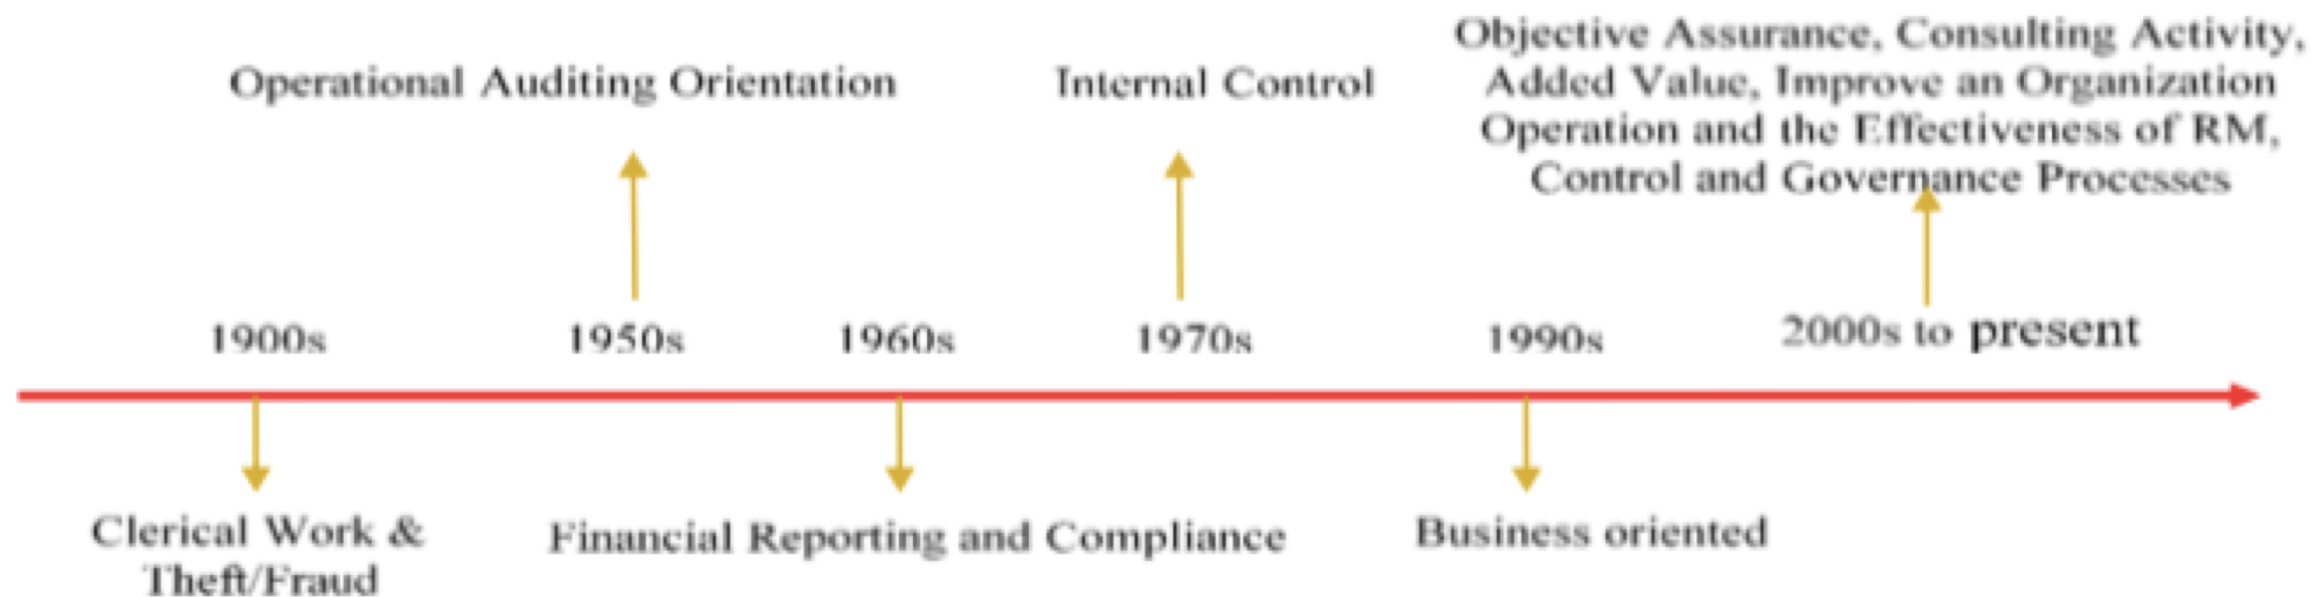

Fokus pada error,
fraud, theft, repetition

Great Depression – crash
Verification of financial records
Aids to Accounting/External
auditor

Milestones profesi sampai 1999

KEY MILESTONES

IA Set to Emerge as a Profession

- 1941-Formation of the IIA
- 1947-Issued the Statement of the Responsibilities of the IA (Revised in 1957, 1971, 1976, 1981, and 1990)

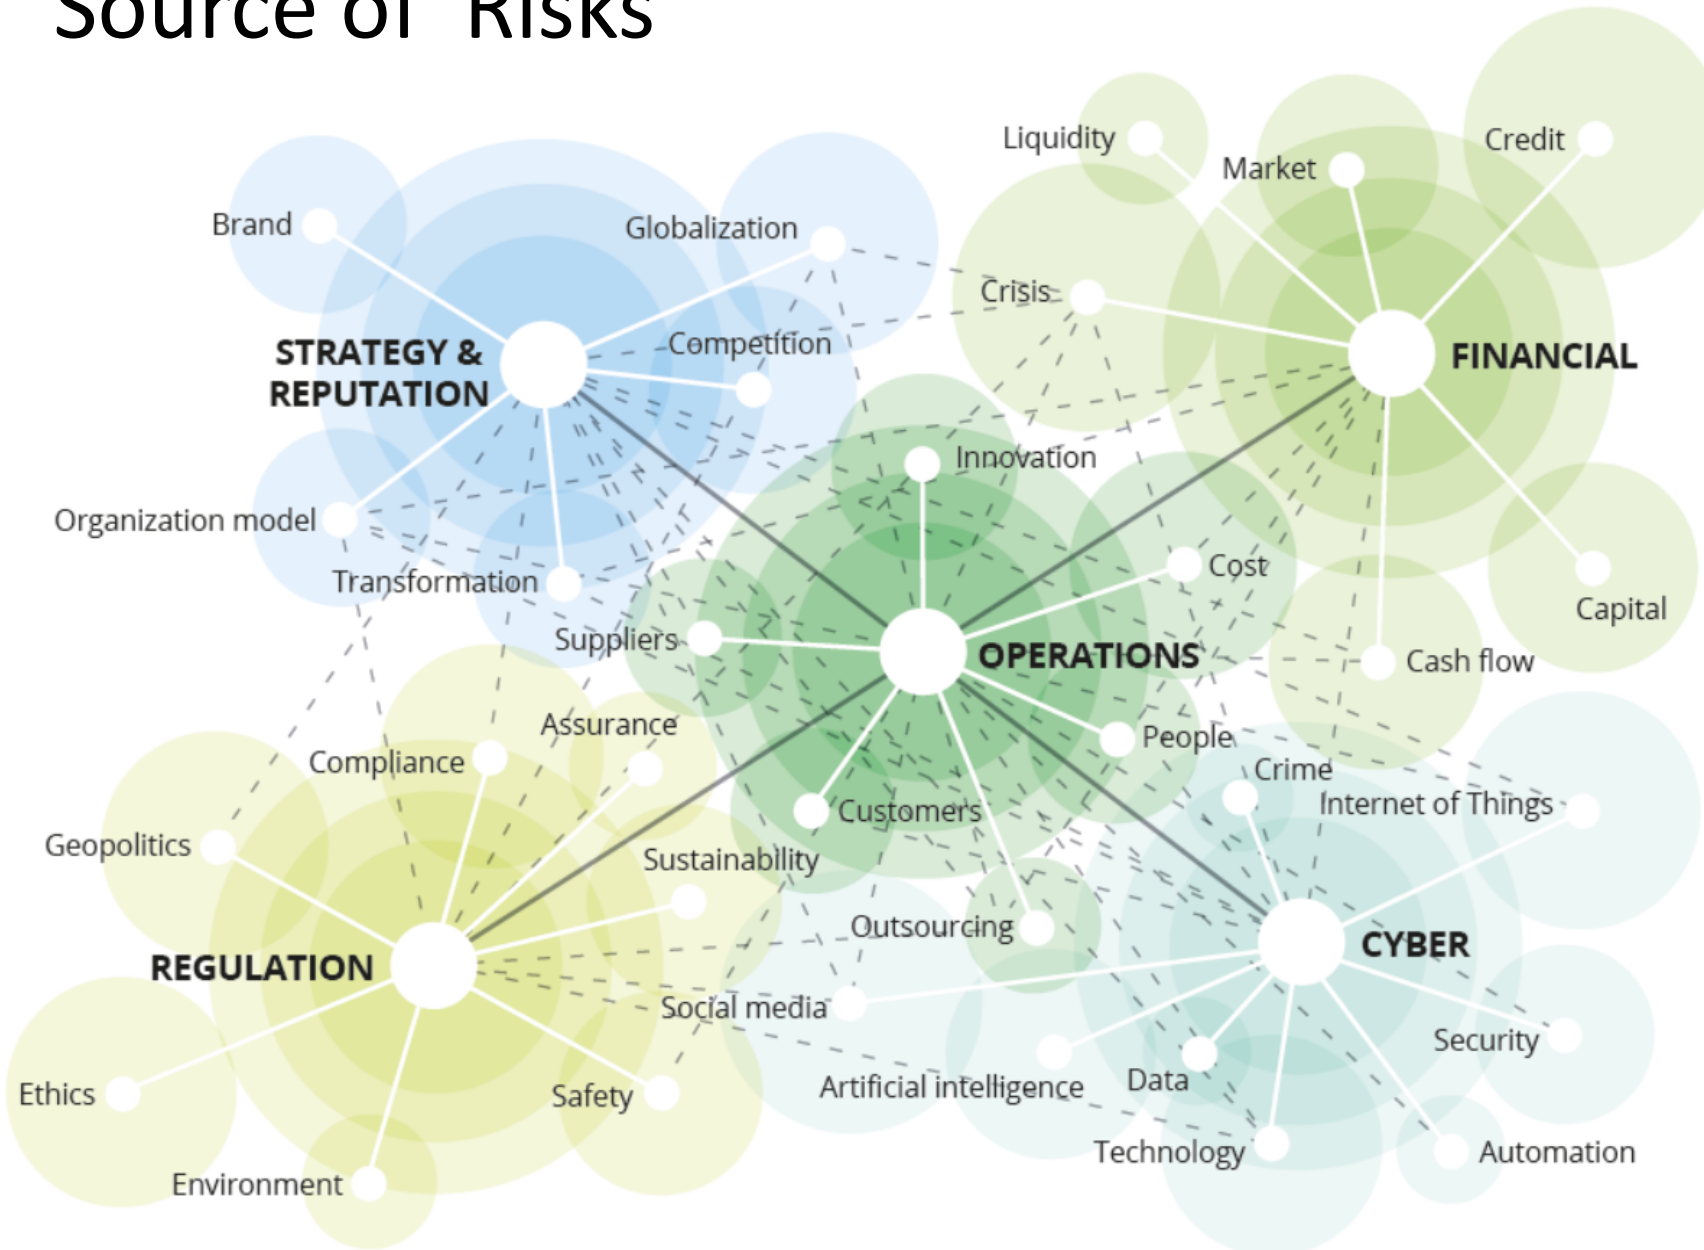

IA Began as a Profession

- 1968-Issued the Code of Ethics
- 1972-Published the CBOK
- 1974-Created the Professional Certification for IA
- 1976-Formation of the IIA Research Foundation
- 1977-Created a Professional Magazine for IA
- 1978-Issued the Standards

Advances & Strengthening of IA Profession

- 1999-Issued Current Definition of IA
 - 2000-Revised the Code of Ethics
 - 2002-Issued a New IA Standards
 - 2006-The Standards has been Recognized Globally
 - 2007-Issued a New IA Framework- the IPPF*
 - 2015-Issued a New Enhancement of the IPPF
- *The IPPF is subject to update once in every 2 years

Source of Risks

**Organisasi
menghadapi
meningkatnya
ketidakpastian dari
berbagai sumber**

Figure 2: Top five disruptions

March 2017

**Staying the course
toward True North:
Navigating disruption**

CYBERSECURITY: The growing sophistication and variety of cyberattacks continue to wreak havoc on organizations' brands and reputations, often resulting in disastrous financial impacts. This risk examines whether organizations are sufficiently prepared to manage cyber threats that could cause disruption and reputational harm.

DATA PROTECTION: Beyond regulatory compliance, data privacy concerns are growing as investors and the general public demand greater control and increased security over personal data. This risk examines how organizations protect sensitive data in their care.

REGULATORY CHANGE: A variety of regulatory issues, from tariffs to new data privacy laws, drive interest in this risk. This risk examines the challenges organizations face in a dynamic and sometimes volatile regulatory environment.

BUSINESS CONTINUITY/CRISIS RESPONSE: Organizations face significant existential challenges, from cyber breaches and natural disasters to reputational scandals and succession planning. This risk examines organizations' abilities to prepare, react, respond, and recover.

DATA AND NEW TECHNOLOGY: Organizations face significant disruption driven by the accelerating pace of technology and the growing ease of mass data collection. Consider traditional versus born-digital business models. This risk examines organizations' abilities to leverage data and new technology to thrive in the fourth industrial revolution.

THIRD PARTY: Increasing reliance on third parties for services, especially around IT, demands greater oversight and improved processes. This risk examines organizations' abilities to select and monitor third-party contracts.

TALENT MANAGEMENT: Historically low unemployment, a growing gig economy, and the continuing impact of digitalization are redefining how work gets done. This risk examines challenges organizations face in identifying, acquiring, and retaining the right talent to achieve their objectives.

CULTURE: "The way things get done around here" has been at the core of a number of corporate scandals. This risk examines whether organizations understand, monitor, and manage the tone, incentives, and actions that drive behavior.

BOARD INFORMATION: As regulators, investors, and the public demand stronger board oversight, boards place greater reliance on the information they are provided for decision-making. This risk examines whether boards are receiving complete, timely, transparent, accurate, and relevant information.

DATA ETHICS: Sophistication of the collection, analysis, and use of data is expanding exponentially, complicated by artificial intelligence. This risk examines organizational conduct and the potential associated reputational and financial damages for failure to establish proper data governance.

SUSTAINABILITY: The growth of environmental, social, and governance (ESG) awareness increasingly influences organizational decision-making. This risk examines organizations' abilities to establish strategies to address long-term sustainability issues.

2020	
1.	Cybersecurity & data privacy: rising expectations of internal audit
2.	The increasing regulatory burden
3.	Digitalisation & business model disruption
4.	Looking beyond third parties
5.	Business resilience, brand value & reputation
6.	Financial risks: from low returns to rising debt
7.	Geopolitical instability & the macroeconomy
8.	Human capital: the organisation of the future
9.	Governance, ethics & culture: the exemplary organisation
10.	Climate change: risk vs opportunity

RISK	CURRENT	FUTURE	CHANGE
CYBERSECURITY	86%	90%	+4 ↑
DATA PROTECTION	78%	85%	+7 ↑
REGULATORY CHANGE	66%	64%	-2 ↓
BUSINESS CONTINUITY	65%	67%	+2 ↑
DATA AND NEW TECHNOLOGY	64%	82%	+18 ↑
THIRD PARTY	60%	66%	+6 ↑
TALENT MANAGEMENT	58%	65%	+7 ↑
CULTURE	57%	58%	+1 ↑
BOARD INFORMATION	54%	51%	-3 ↓
DATA ETHICS	51%	66%	+15 ↑
SUSTAINABILITY (ESG)	30%	45%	+15 ↑

Figure 10: Risk Relevance for 11 Risks

Top 20 risks before 2020

- 1 Digitalization, Industry 4.0 & the Internet of Things
- 2 Cloud computing
- 3 EU General Data Protection Regulation (EU-GDPR)
- 4 Cyber security
- 5 Business continuity and crisis response
- 6 Net working capital management
- 7 Non-GAAP financial measures
- 8 Data analytics and mass data usage
- 9 Treasury management
- 10 Organization-wide initiatives/projects
- 11 Effective talent management
- 12 Trade environment and customs
- 13 Alignment of operations to organization's strategy and objectives
- 14 Compliance Management Systems (CMS), auditing organization culture and ethics
- 15 Effectiveness and efficiency of operational processes
- 16 Mergers, acquisitions, and divestitures
- 17 Integrated enterprise risk management and monitoring
- 18 IT governance
- 19 Outsourcing and managing third-party relationships
- 20 Tax compliance

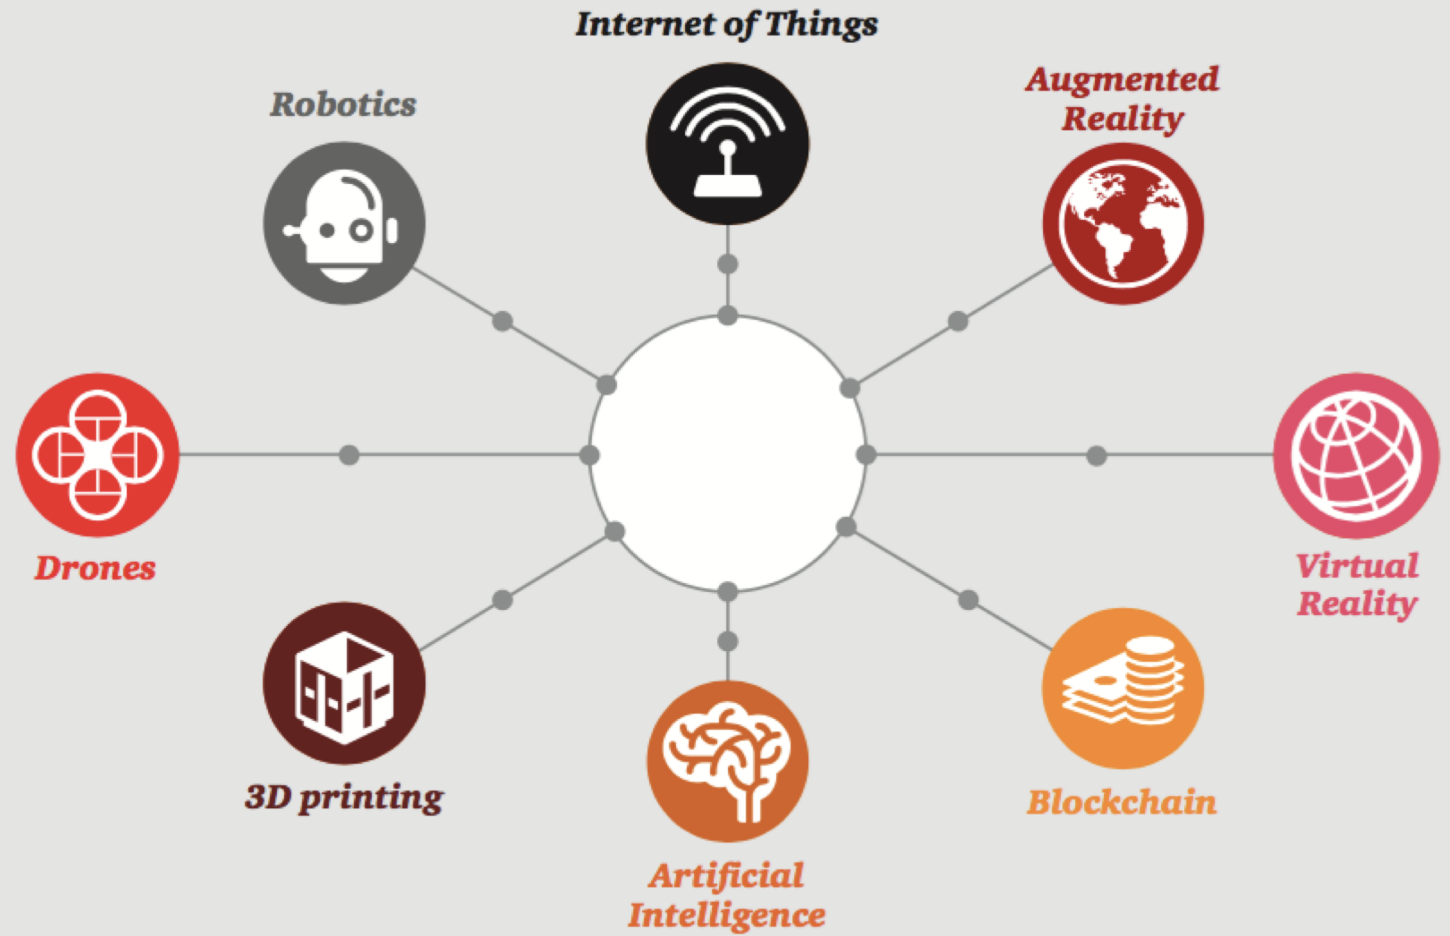

Figure 1: The essential eight emerging technologies

Source: PwC, "How can boards tackle the Essential Eight and other emerging technologies?", June 2017

Libelium Smart World

Air Pollution

Control of CO₂ emissions of factories, pollution emitted by cars and toxic gases generated in farms.

Forest Fire Detection

Monitoring of combustion gases and preemptive fire conditions to define alert zones.

Wine Quality Enhancing

Monitoring soil moisture and trunk diameter in vineyards to control the amount of sugar in grapes and grapevine health.

Offspring Care

Control of growing conditions of the offspring in animal farms to ensure its survival and health.

Sportsmen Care

Vital signs monitoring in high performance centers and fields.

Structural Health

Monitoring of vibrations and material conditions in buildings, bridges and historical monuments.

Quality of Shipment Conditions

Monitoring of vibrations, strokes, container openings or cold chain maintenance for insurance purposes.

Smartphones Detection

Detect iPhone and Android devices and in general any device which works with Wifi or Bluetooth interfaces.

Perimeter Access Control

Access control to restricted areas and detection of people in non-authorized areas.

Radiation Levels

Distributed measurement of radiation levels in nuclear power stations surroundings to generate leakage alerts.

Electromagnetic Levels

Measurement of the energy radiated by cell stations and WiFi routers.

Traffic Congestion

Monitoring of vehicles and pedestrian affluence to optimize driving and walking routes.

Smart Roads

Warning messages and diversions according to climate conditions and unexpected events like accidents or traffic jams.

Smart Lighting

Intelligent and weather adaptive lighting in street lights.

Intelligent Shopping

Getting advices in the point of sale according to customer habits, preferences, presence of allergic components for them or expiring dates.

Noise Urban Maps

Sound monitoring in bar areas and centric zones in real time.

Water Leakages

Detection of liquid presence outside tanks and pressure variations along pipes.

Vehicle Auto-diagnosis

Information collection from CanBus to send real time alarms to emergencies or provide advice to drivers.

Item Location

Search of individual items in big surfaces like warehouses or harbours.

Waste Management

Detection of rubbish levels in containers to optimize the trash collection routes.

Smart Parking

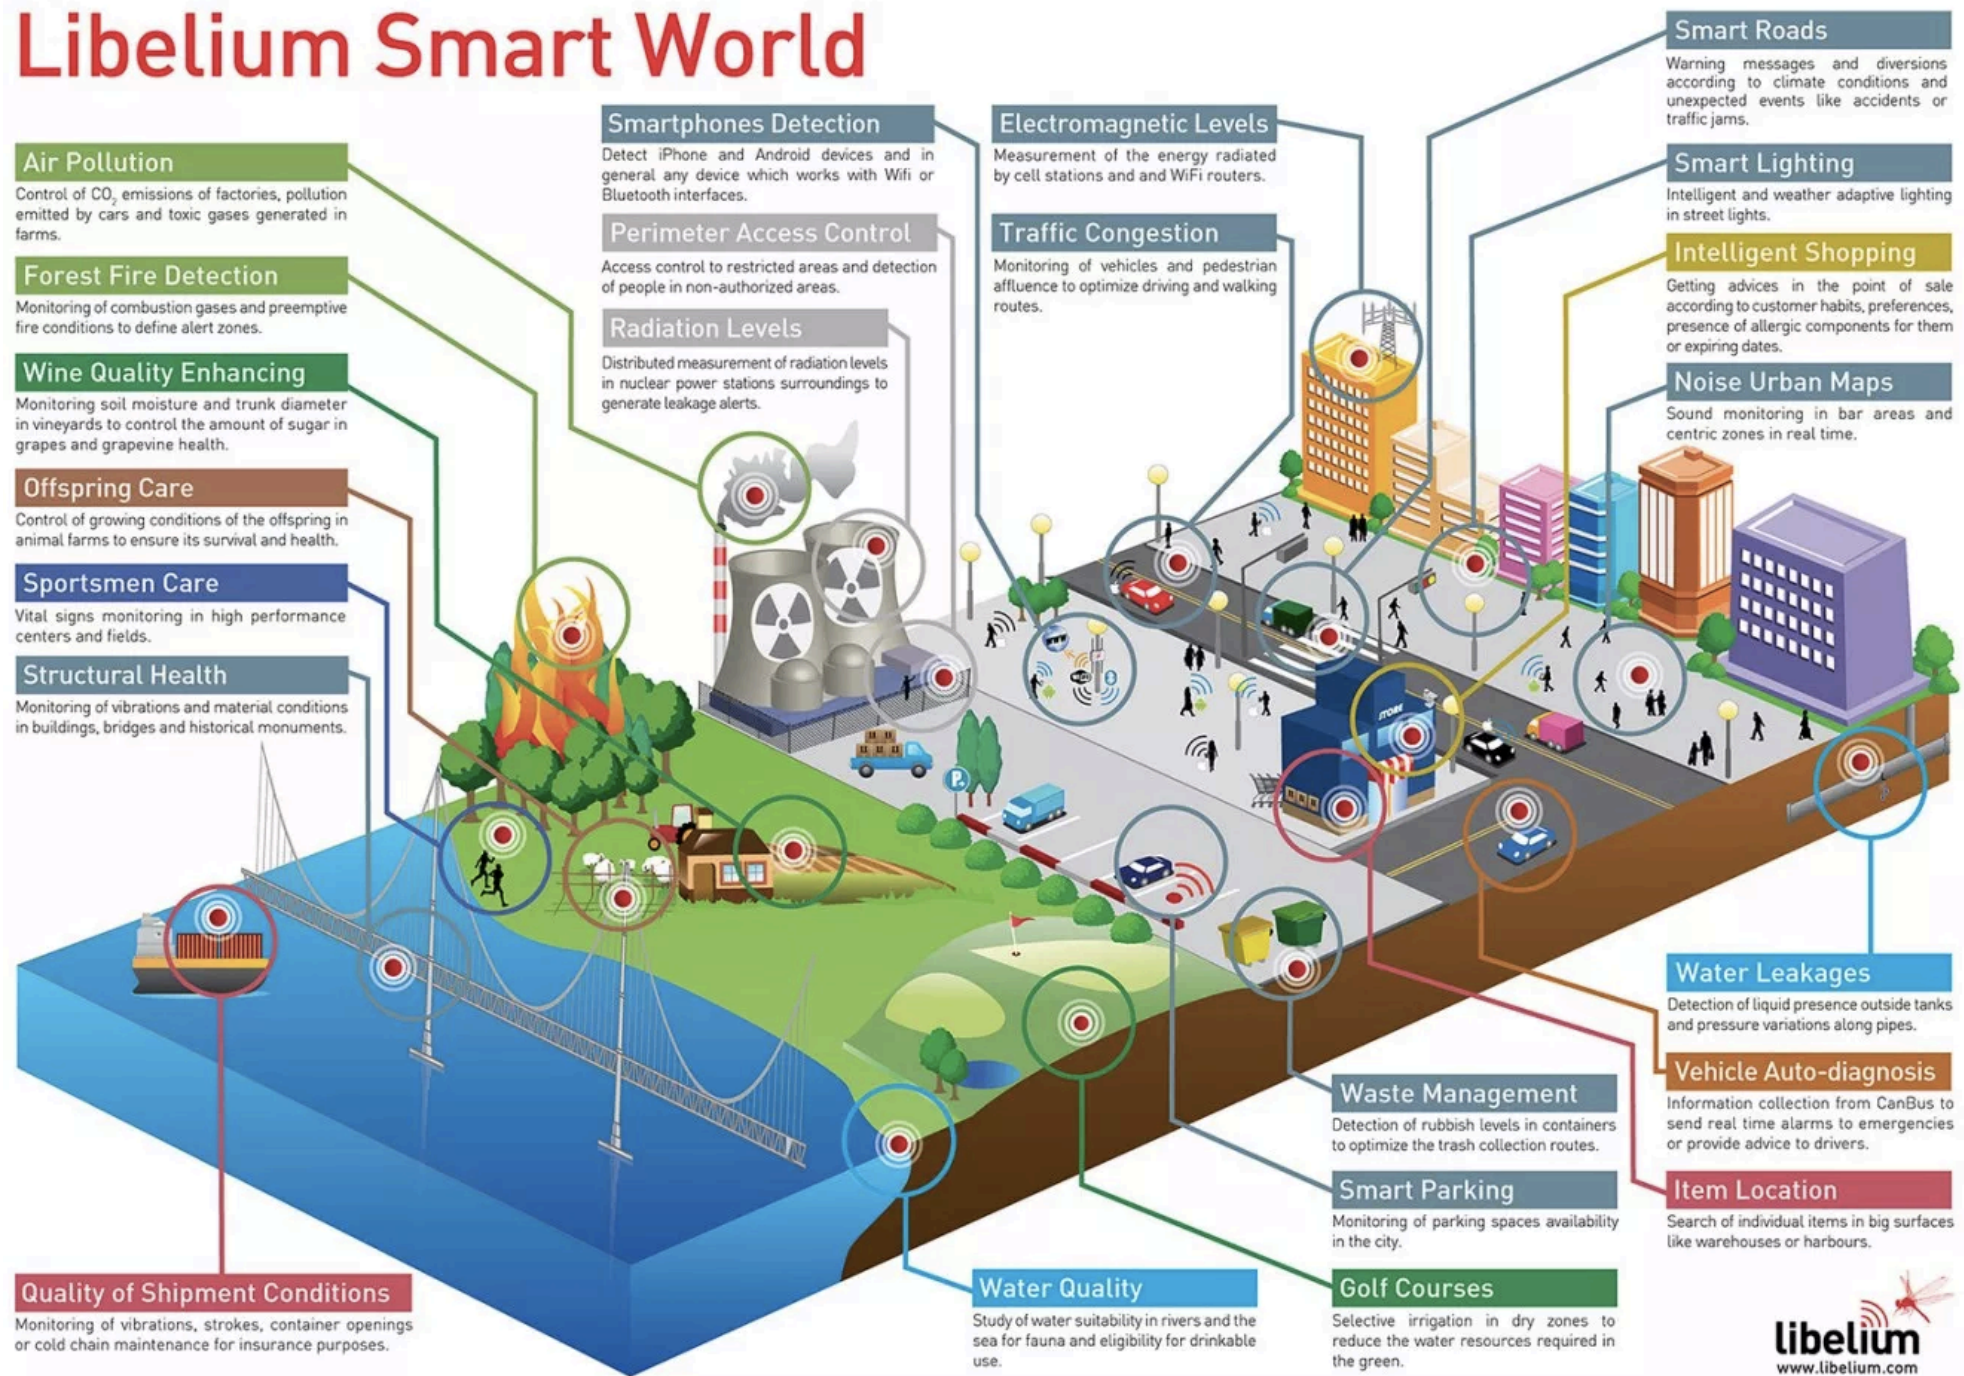

Monitoring of parking spaces availability in the city.

Golf Courses

Selective irrigation in dry zones to reduce the water resources required in the green.

Water Quality

Study of water suitability in rivers and the sea for fauna and eligibility for drinkable use.

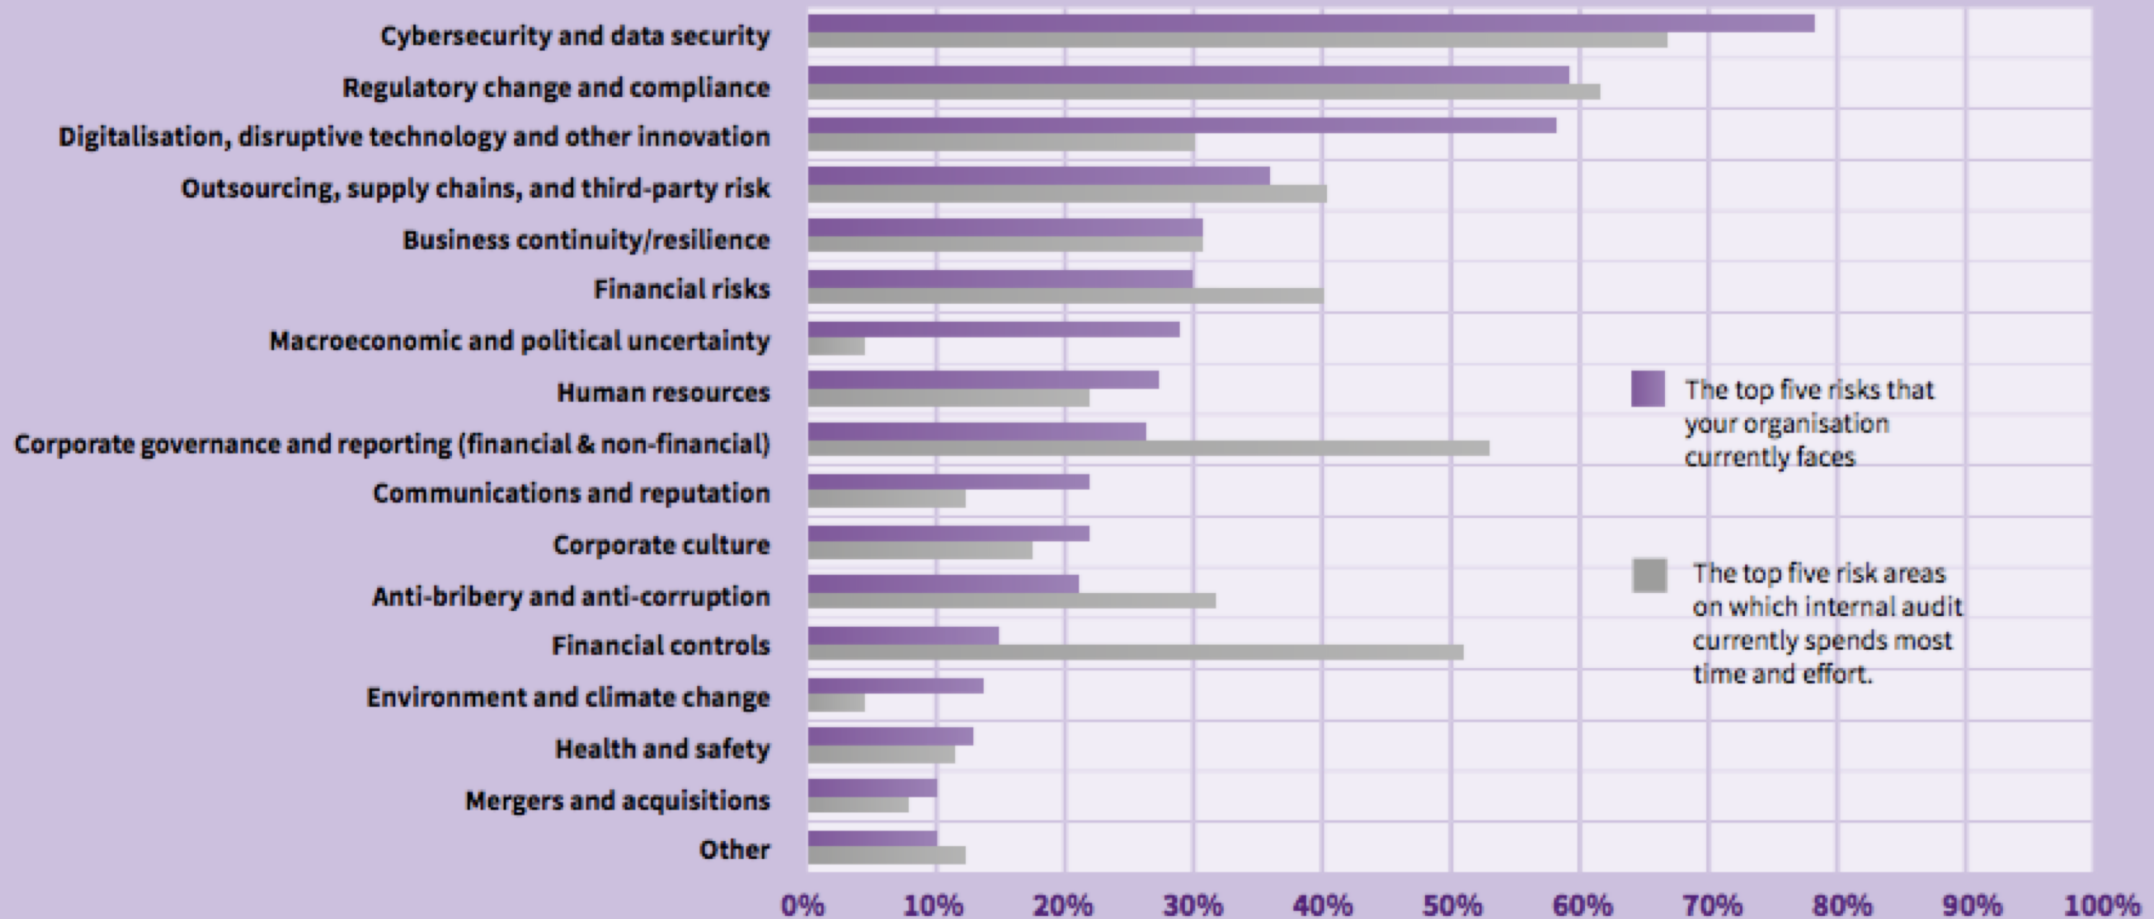

What are the top five risks to your organisation?

What is the single biggest risk to your organisation?

The top five risks that your organisation currently faces vs the top five risk areas on which internal audit currently spends most time and effort:

The top five risks that your organisation currently faces vs the top five risks you think your organisation will face in five years' time:

Third Line of
Defense

Review 2019 - 3LoD model

Statis, tidak mencerminkan realitas saat ini

Tidak dinamis, sebagaimana kompleksitas organisasi modern

Fokus pada *defense*, mengabaikan value creation, preservation

Silo – blurring of the lines

Limit the roles of internal auditor (trusted advisor, strategic partners)

Value creation dalam organisasi

Enabler of organizational success and value creation

Enabler of organizational success and value creation

- Regular communication
- Strategy aligned
- Common understanding
- Common vocabulary
- Common rating/measures
- Leverage data/technology
- Blurring the lines (w/ safeguard)

GRC - Disruption challenges

Demand for
increased
performance

Demand for
increased visibility

Growing,
conflicting,
overlapping
regulations

Change in value
creation &
valuation

Increasing the
pace of changes

Finding the 'true
north' - turbulence
forces

Strategic risk -
game changers

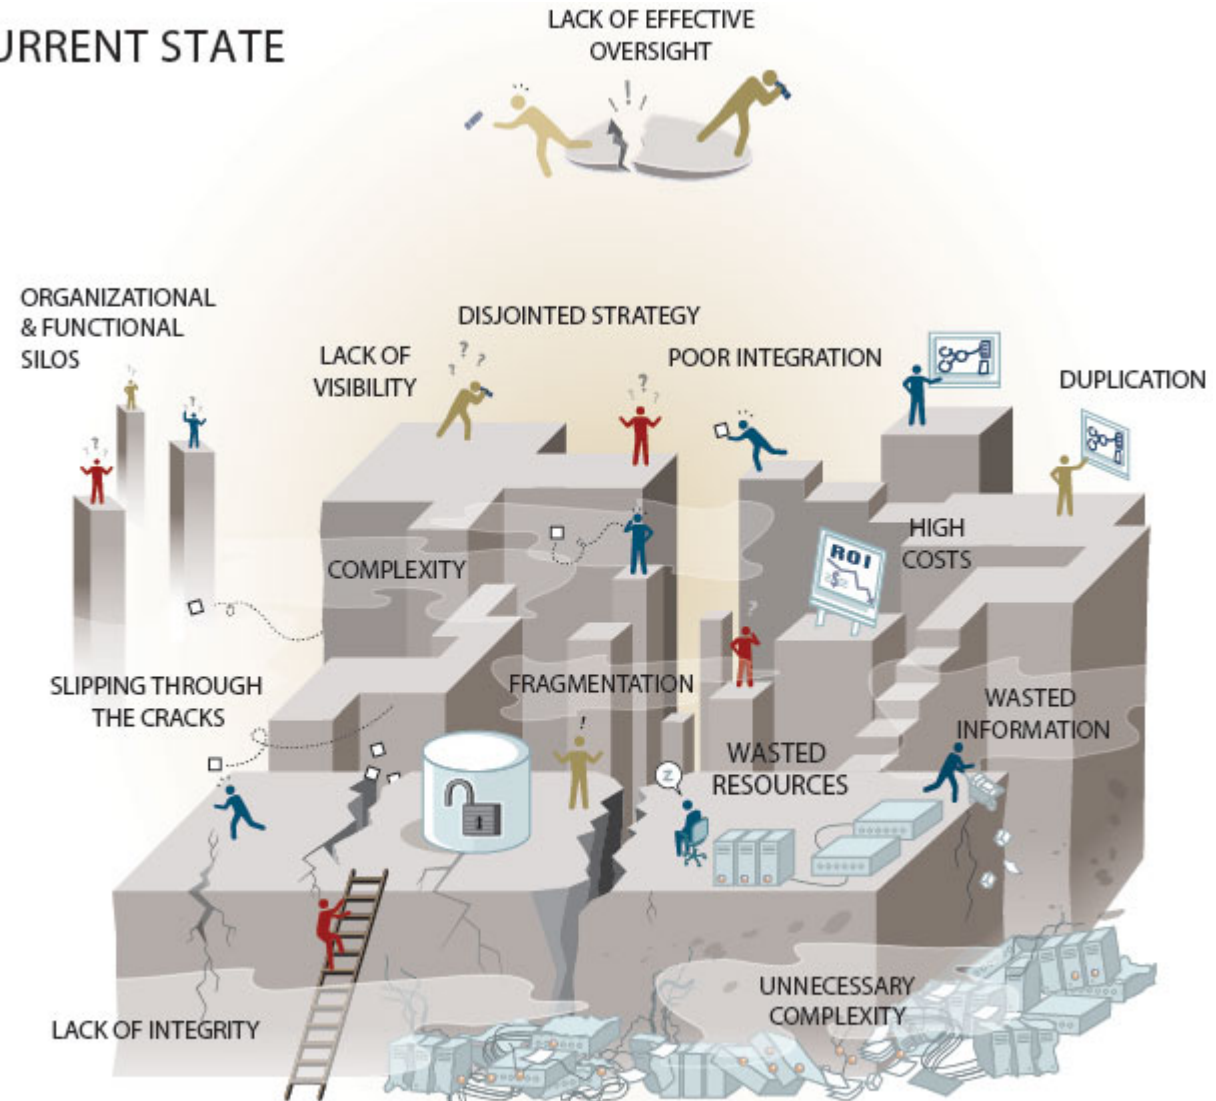

Connected -
disintermediation

Digitalization, AI,
big data, robotics,
IoT

Respons kita terhadap tantangan ini → membuat berbagai program dan fungsi, tetapi **fragmented dan silo**:

- Objectives yang counter productive
- Strategi yang suboptimal
- Kinerja tidak optimal
- Lack of information quality
- Flows informasi yang tidak memadai
- Wrong decisions: ineffective actions and controls
- Tend to add more actions and controls
- Fail to grasp opportunities
- Lack of foundation of a well-run business

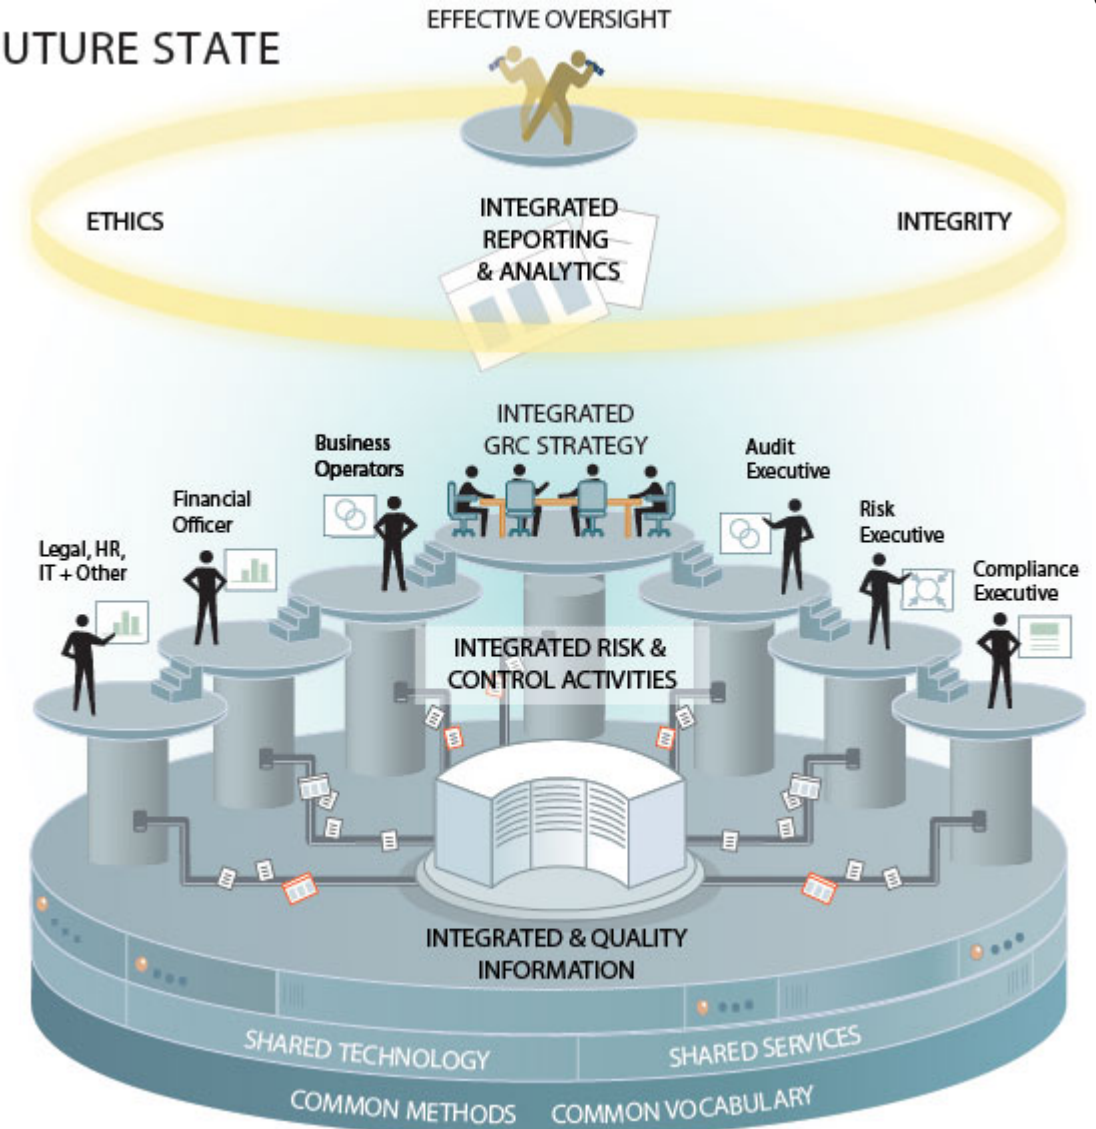

CURRENT STATE

Solusinya adalah membuat pendekatan yang memastikan bahwa:

- the right people get the right information at the right times;
 - the right objectives are established;
 - and that the right actions and controls are put in place to address uncertainty and act with integrity.
-
- Mengurangi biaya
 - Mengurangi duplikasi kegiatan
 - Mengurangi dampak terhadap operasi
 - Mendapatkan *information quality* yang lebih baik
 - Mampu mengumpulkan informasi secara cepat dan efisien
 - Memiliki kemampuan untuk mengulangi proses secara konsisten dengan lebih cepat

FUTURE STATE

GRC

PRINCIPLED PERFORMANCE

Principled Performance

4 reliable achievement of objectives
1 while addressing uncertainty
2 and acting with integrity
3

Signatory of:

GRC Integration

COSO ERM 2017

Benang Merah

Lingkungan bisnis, disrupsi, dan risiko baru berkembang sangat cepat, dari berbagai sumber

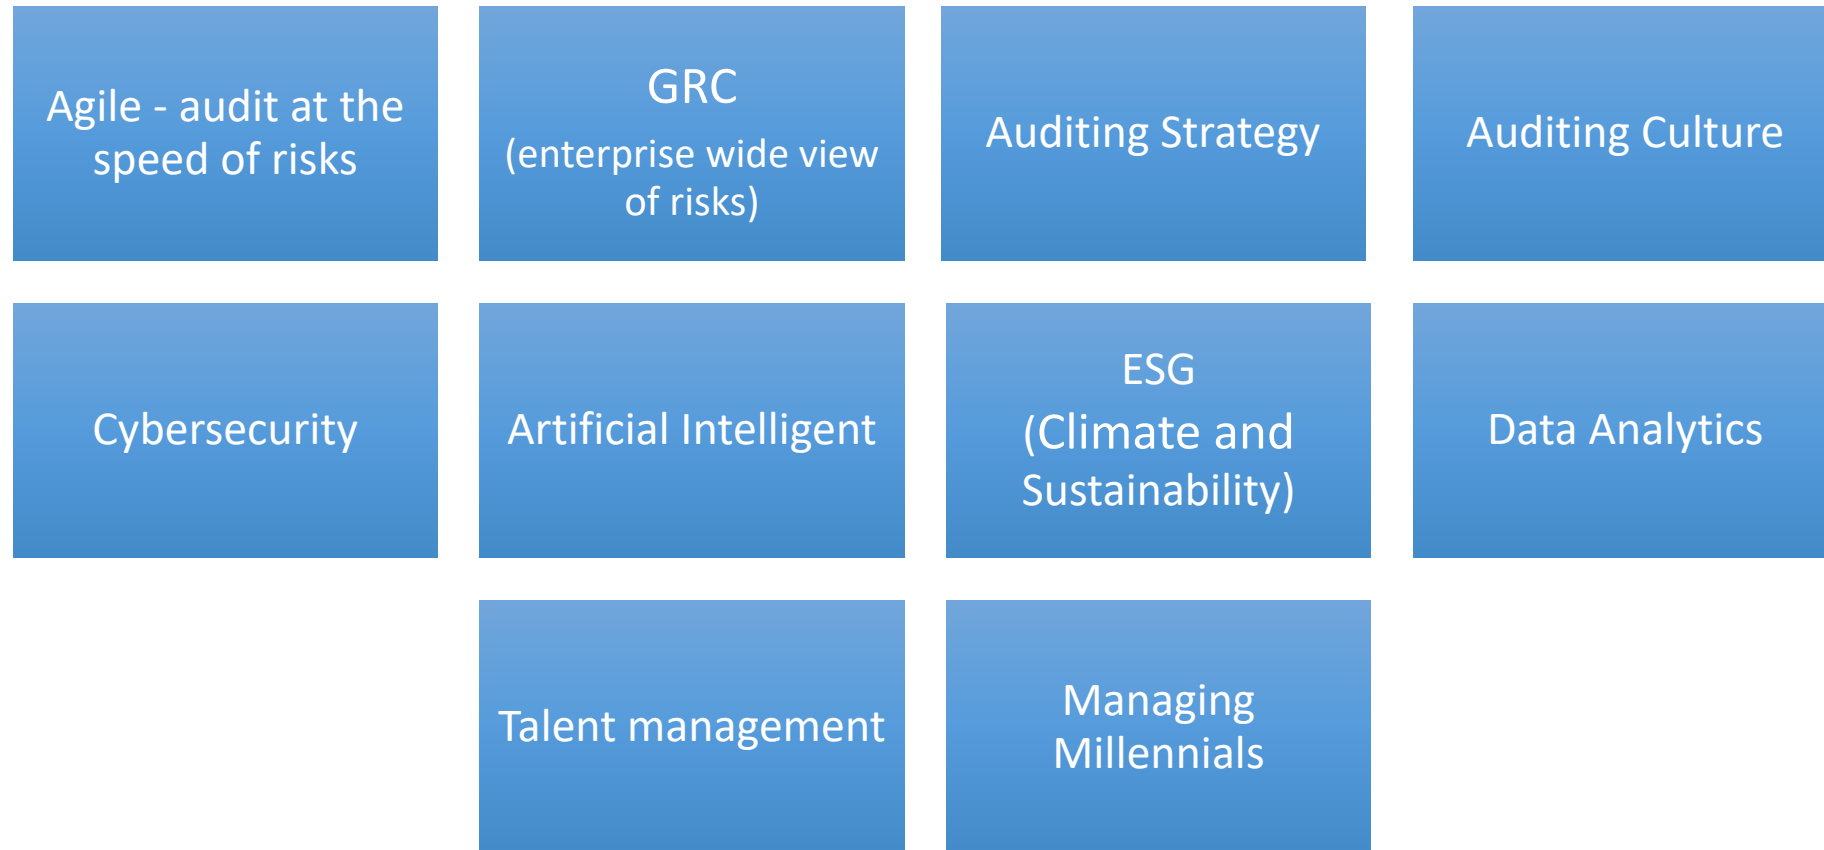

Respon kita terhadap perubahan lingkungan tidak memadai

- Reaktif, Silo, dan terfragmentasi
- Merespon dengan menambah pengendalian
- Strategy dan objective yang tidak tepat
- Kualitas dan flows informasi yang tidak baik
- Tidak memberi fondasi untuk mengelola business yang well run

Revisi 3LoD, GRC, dan COSO ERM memberikan kerangka untuk mengatasi kelemahan fundamental tersebut

- Integration, communication, culture, & technology,
- Establish process before technology
- Beware of building another silo
- Seek out overlaps and build efficiencies
- Create a common language and vocabularies: skeleton, calibration
- Integration means optimal allocation of resources and achieving objectives confidently
